SUMMARY

Final year B.Tech Cybersecurity student with a strong pivot into fintech. Self-directed study in UPI architecture, payment flows, financial risk models, and fraud systems backed by two live deployed projects. Looking for fintech analyst or product-adjacent roles at early-stage startups where engineering background meets financial thinking.

EXPERIENCE

Streetplay.ai **Bangalore, India**
Fundraising and Partnerships, Intern **Jul. 25 – Jan. 26**

- Found and connected with early-stage startup investors in the US who are interested in Sports Tech and AI.
- Helped refine our pitch deck and story for fundraising.
- Built partnerships with football turfs and academies and marketing.

Superior Electric Machines Pvt Ltd **Bangalore, India**
Accounting Intern **Mar. 25 – Jun. 25**

- Financial reports – profit & loss statements, balance sheets.
- Basics audit readiness, cost management in a manufacturing setup.

PROJECTS

RiskLens - Stock Portfolio Risk Analyzer **Jun. 26**

- Built a web app that analyzes stock portfolio risk using real market data - Sharpe Ratio, Value at Risk (95%), annualized volatility, and stock correlation heatmap.
- Supports both Indian (.NS) and US stock tickers with autocomplete; deployed live on Render.
- Live: stock-risk-analyzer-l02b.onrender.com GitHub: abhinavharisri/stock-risk-analyzer
- Technologies: Python, Flask, yfinance, Pandas, Plotly

EDUCATION

Presidency University **Bangalore, India**
Bachelor of Technology in Cybersecurity Sep. 23 – June. 27
