Stock Buy/Sell Tracker — Abhinav Harisri

Analyst: Abhinav Harisri

Reasoning
Strong revenue growth (+186% YoY) driven by Blinkit but annual profit declining due to expansion costs. Overvalued at 9.9x P/S. Wait for profitability signal.
RBI licence cancellation, lost UPI market share to PhonePe and Google Pay (85% combined). Recovery to profitability expected FY28-29. High risk, low near term return.
Stock down 38% YoY creating value buying opportunity. India EV segment growing 30-40% YoY. Rising fuel prices accelerating EV adoption. JLR margin pressure is short term.
Record revenue and EPS in Q1 FY26. India market share grew from 5% to 23% in 4 years. Status driven consumer behavior in India creates structural demand. 13-16% revenue growth guided.
Revenue up 17% YoY to $11.2B. Pure transaction fee model with no credit risk. Direct beneficiary of global shift to digital payments. Strong Buy consensus from Goldman, Citi, UBS.
81% AI chip market share. Revenue up 65% to $215.9B in FY26. AI capex projected to grow 5-6x by 2030. PEG ratio of 0.68 cheaper than AMD's 1.09 relative to growth.
World's #1 investment bank by fees. Diversified across consumer, commercial, IB and wealth management. Stock up 17.7% YoY. $50B buyback program. Expanding into tokenized payments.
